

# EXECUTIVE SUMMARY

DigVel is a trusted provider of cybersecurity services, delivering top-notch consulting and SecOps solutions through a team of vetted experts to strengthen operations in the ever-changing digital landscape. As a spin-off of Apriorit we leverage its two decades of experience in cybersecurity technologies, regulations and operations to implement cutting-edge security measures and promote a comprehensive cybersecurity culture in a multiplex digital environment.

---

## KEY SERVICES

We help our partners strengthen cyber security posture by rapidly deploying new and augmenting existing teams, improving their protection, staff training and continuous quality control. DigVel offers services in various cybersecurity areas, including:

### ➤ SECURITY ASSESSMENT

Shielding digital assets with meticulously evaluating systems, validating security measures and ensuring compliance with established security policies and procedures.

### ➤ CYBERSECURITY MEASURES IMPLEMENTATION

Expert deployment of cutting-edge security measures including integration of technical controls from firewalls, IDS, IPS, endpoint protection software to encryption tools and anti-malware solutions.

### ➤ PENETRATION TESTING

Ensuring systems remain impenetrable and business operations run smoothly without interruptions by uncovering hidden vulnerabilities before cybercriminals do.

### ➤ CERTIFICATION ASSESSMENT

Consulting and technical preparations for achieving compliance with industry standards and regulations that helps to meet legal requirements effortlessly with certification in SOC2, ISO 27001, PSI DSS etc.

### ➤ SECURITY OPERATIONS CENTER TEAMS

24/7 military-grade cyber protection with a team of vetted cybersecurity professionals responsible for monitoring, detecting, and responding to cybersecurity threats.

### ➤ COMPLEX INCIDENT INVESTIGATION AND RESPONSE

Recovering data and preventing future incidents with detecting source and cause, implementing protection measures in vulnerable areas, and providing legal support during the investigation process.
